ABOUT THIS HOME

Discover a unique blend of coastal privacy and unparalleled utility in the Graham floor plan, a standout elevated layout in Bolivia's newest construction community, Fords Reach. This home is a dream scenario for boat owners, car enthusiasts, or anyone needing a serious workshop, featuring an oversized, ground-floor two-car garage that measures an incredible 25 by 36 feet. Deep enough to easily accommodate a boat on a trailer, recreational toys, or multiple vehicles, this massive space also includes a dedicated waste and recycling alcove and a deep under-stair storage area. By placing the main entry on the ground floor and the entire living footprint on the level above, the home creates a secure, elevated sanctuary that maximizes privacy and floods the living spaces with natural light. The second-floor layout spans 1,368 square feet of highly functional, open-concept living space. The heart of the home is a bright 16-by-18-foot family room that transitions seamlessly into a well-appointed kitchen featuring a large central island, built-in pantry, and a space-saving stacked laundry
